About

Software engineer with 3+ years in professional tech — internships included — building production backend systems, internal platform capabilities, and large-scale data processing workflows across mobility, telecom, e-commerce, and public-sector environments. Translates product, engineering, and operational requirements into production-ready backend solutions with a focus on scalability, maintainability, testability, and reliable delivery.

Work Experience

PT Infomedia Nusantara June 2026 — Present

Software Engineer

– Software engineer at PT Infomedia Nusantara, delivering production systems in an enterprise engagement.

PT Blue Bird Tbk December 2025 — May 2026

Back End Engineer (Contract)

– Built an internal Mock Control Plane so MyBlueBird QA could test against simulated backend APIs without waiting on incomplete upstream services.
– Implemented dynamic routing and API mocking in Go over gRPC and REST, with Mountebank as the mock engine and PostgreSQL for configuration.
– Designed proxy-level handling that reads Envoy headers to return mocks in QA or forward to live backends, plus a live dashboard for mock scenarios.
– Built a Payment Provider Simulator with stateful balances and transactions so payment flows could be tested end-to-end.
– Collaborated with QA and backend teams on bi-monthly MyBlueBird releases. GitLab for review and version control.

PT Nafisha Universal Network March 2025 — December 2025

Back End Engineer (Contract)

– Designed and maintained Medallion-architecture (Bronze / Silver / Gold) pipelines for large volumes of telecom records.
– Contributed to a generative AI assistant in the MyTelkomsel app.
– Built an electricity-usage dashboard with SMS-gateway alerts, a school management system with facial-recognition check-in, and backend automation for reseller loan processing.

PT Kreasindo Karya Abadi October 2024 — March 2025

Back End Engineer (Contract)

– Fresh-grocery backend in Go (Gin, GORM, MySQL, Redis) with SpeedCash virtual accounts and bank transfers.
– Synced products and promotions with PT. Pro Int.
– BRNR volunteer platform in Express.js, TypeScript, PostgreSQL, Redis, and Google Cloud Storage, with documented REST APIs.

Internships

PT Sagara Asia Teknologi August 2023 — January 2024

Back End Engineer (Internship)

– CRUD APIs in Go (GORM) for customer data, with PostgreSQL persistence.
– SMTP forgot-password flow, plus dashboard and reporting endpoints using AWS S3.

PT MyECO Teknologi Nusantara March 2023 — August 2023

Back End Developer (Internship)

– Express.js APIs so a Laravel Blade admin app could talk to the rest of the stack.
– Sliced admin dashboard, login, and register screens from Figma into Laravel Blade. MySQL for application data.

Ministry of Education, Culture, Research, and Technology February 2023 — June 2023

Back End Developer (Internship)

– Go (Echo) APIs between a Next.js web app and a Flutter mobile app.
– PostgreSQL persistence, server-side business rules, GitHub, and Agile sprint reviews.

PT Citi Asia Internasional January 2023 — March 2023

Full Stack Developer (Internship)

– Responsive company-profile landing page from Figma (HTML, CSS, JS, Bootstrap, jQuery).
– SurveyAsia paid-survey product in Vue.js and Laravel.

PT Berani Digital Indonesia March 2022 — May 2022

Web Developer (Internship)

– Digital card product in Laravel and Talent Career platform UI, with MySQL for application data.

Education

“Veteran” National Development University (UPNVJ) 2020 — 2025

Informatics Engineering — GPA 3.93

– Student organizations and academic study groups; event organizer roles; UPNVJ Design Competition.

Organizational Experience

Multimedia Academic Study Group January 2022 — December 2022

Staff, Website Dev — mentor; Tech & Support lead, MIA 2022

Multimedia Academic Study Group March 2021 — August 2021

Member, Website Dev

Cyber Security Academic Study Group February 2021 — August 2021

Member, Cyber Department

UFO “Veteran” Jakarta Student Association December 2020 — June 2021

Junior Member, Design — UFOFEST 2021 sponsorship

Skills

Languages: Go, Java, Python, JavaScript, TypeScript, PHP

Data: PostgreSQL, MySQL, Redis, Kafka, RabbitMQ, Elasticsearch / Kibana

Backend: Beego, Echo, Gin, Fiber, Express.js, Laravel, CodeIgniter

Cloud & delivery: Docker, Kubernetes, GitHub Actions, GitLab CI, Jenkins, ArgoCD

Frontend: Vue.js, React, jQuery, Bootstrap, Tailwind CSS

Practice: Scrum, Waterfall, Swagger, Postman, GitHub, GitLab, Asana, Trello, Jira
